

# Truck Ramp

## Type TR1-CW

Galvanised gripmesh on the ramp area enables good tyre grip. To prevent tyre wear, floor plate is used in the manoeuvring areas at the foot of the ramp and the horizontal stage.

With centre wheels this ramp is easily moved into position, by the forklift engaging in the unique fork clamp and steering the ramp. Height adjustment via twin hydraulic cylinders and handpump.

### SPECIFICATIONS

Capacity	6000kg SWL
Unit weight	3000kg
Overall width	2180mm
Drive width	1830mm
