

SL Spill Bins

The East West range of SL Spill Bins provide complete protection against damaging and costly chemical spills. Manufactured from long life galvanised steel, spill bins are available for one, two, three, four and six drums. Also available to suit 1000L Intermediate Bulk Containers. Close spacing of support bars (300x150) allows for large or small drums up to 2000kg SWL. If required timber pallets will fit within the raised skirt, or drums can be placed directly on the support bars. All models have a spill capacity exceeding Australian Government regulations of 110% containment of the largest drum.
