

# Drum Storage Systems

The East West drum rack system provides a cleaner environment and a safer working area by protecting against chemical spills. Each system comprises a stand alone drum rack with bolted assembly, and spill containment tray under. In the advent of a spill the tray can be removed without disturbing the drum above. Each tray is fitted with a removable plug to facilitate emptying. Galvanised finished.

OPTIONS TO THE DRUM STORAGE SYSTEMS INCLUDE: -

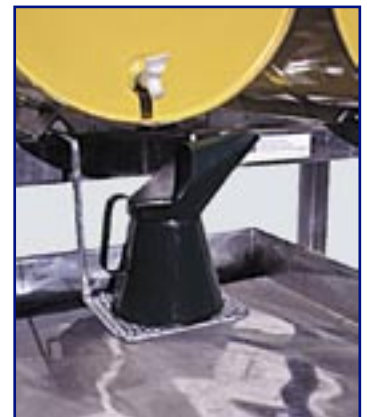

- Roller support angles (RSA)
- One litre oil tin tray (SRA)
- Support rack to spill bin (LRU)

Type RSA

Type LRU

Type SRA

Also available from the East West range of Forklift Attachments are drum grabs, rotators and drum turners to enable simple yet safe placement of drums in our Storage Systems.
